INTRODUCTION.

The Visitation pedigrees forming parts I and II of this volume were omitted from volume 144 of the publications of this society for the reason stated on page xi of the introduction to that volume. Their publication completes that of the northern visitations suggested as desirable by Dr. F. W. Dendy in his introduction to volume 122, pp. xlv-vi.

The section of Harleian MS. No. 1171 here copied is thus described in *Catalogue of the Harleian Manuscripts*: "Part I of the Visitation book of the County of York as it was taken A.D. 1575 by William Flower Esq. Norrey, which has in some places the usual signs of the Original Papers . . . the word 'Entred' written at divers of the descents with red ink. . . . Certain hands subscribing to the pedigrees . . . a Cross made with red ink or other marks . . . set at divers Descents." It would therefore seem certain that these pedigrees are upon the loose sheets upon which they would be first written by the visiting heralds and afterwards copied into the appropriate book. William Flower, who was created Norroy King of Arms in 1562, is said to have been born in 1498, and so must have been an old man when he made his visitations of 1575. He was accompanied by his son-in-law, Robert Glover, who had been Somerset herald since 1571. Glover's services were much used by his contemporary Kings of Arms. His zeal, skill and unwearying diligence appear to have been recognized by the heralds of his own day as much as by those of later times, who owe so much to his work. That Flower did himself make this visitation seems certain; he granted arms to Anthony Gatonby by letters patent dated at Gatonby July 1575 (p. 7 below). He also granted arms and crest to Richard Jessop by letters patent dated 13 July 1575 (p. 72 below), whilst both he and Glover subscribe to the arms allowed to William Wycliff of Wycliff (p. 15 below). The pedigrees are

mostly dated by the entry of the last generation, and in some the age of the heir in 1575 is given : thus, Marmaduke Constable was then one year old (p. 5 below) and William Gatonby ten years of age (p. 7 below). Three at least of the pedigrees are, however, later than this, and are apparently from Glover's visitation of 1584/85, then taken by him as Norroy's deputy. These are Catterick of Stanwix subscribed to by John Garth 12 August 1585 (p. 4 below), Freston of Warmfield which ends in John and William living in 1585, and Wandesford of Kirklington (p. 28 below) which is undated but seems to be of the later date. The pedigrees in the later folios of the manuscript are not so detailed as those on the earlier ones, and are very similar to those of the same families printed in volumes 122 and 133 of this society.

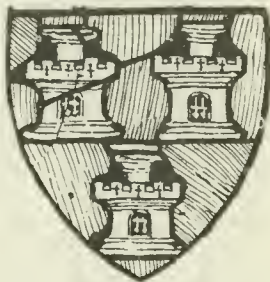

Shields of arms and crests accompany many of the pedigrees, and in some, arms illustrating descents and alliances, are also given. Examples of these are Phillipp, p. 2 ff., Lassels, p. 17 ff., and Wandesford, p. 28 ff. The drawings, from which the illustrations of this part have been made, were specially drawn for this purpose some years ago, when an earlier publication was expected, by the late W. Harry Rylands. It is interesting to note the difference there is between the armorials in this visitation and those blazoned for the same families in that of 1480-1500, published in the 144th volume of this society. At the earlier date not a quartered shield is blazoned ; each family is then given only its own proper shield, whereas the heralds of the later date blazon many quarterings, very different from the simplicity of the earlier armory : note for example the nine quarterings of Constable, the ten of Aske or the eight each of Metham, Ellerker and Willesthorpe, all of which compare with their single paternal shield of the previous century. The blazon also, which in the first visitation is usually given in full, is now indicated by small single letters placed upon the field and charges.

The pedigrees forming part II are chiefly from MS. No. 97 at Queen's College; the additions from MS. No. 126 are printed in italics, whilst those from the Studley Royal manuscript are placed within round brackets. As stated on page iii of MS. No. 126 (see p. 73 below) this visitation was also made by William Flower and Robert Glover; the latter, by a curious error, is called Portcullis pursuivant of arms, an office he vacated in 1571. MS.

No. 126 contains also the visitation pedigrees of the county of Durham taken by the same heralds in the same year: this has been twice printed, first in a limited edition in folio published at Newcastle in 1820 by N. J. Philipson, and secondly by Joseph Foster in 1887 with the pedigrees of the visitations of 1615 and 1666 added. The Northumberland pedigrees, however, have not been published in full, though Foster included four of them, Delaval, Fenwick, Forster and Lawson with some additions and alterations in his *Northumberland Visitation Pedigrees*, Newcastle, N.D. In this volume he also included some of Northumberland, taken, the preface says, from Flower's *Visitation of Yorkshire* in 1575.

The title, list of pedigrees and note upon the "anciente arms" of Newcastle upon Tyne only appear in MS. No. 126, but no drawing is there given either of the arms or of the crest and supporters "annexed" to them by Flower by letters patent¹ dated 16 August 1575. They are, however, roughly tricked in both Harleian MSS. Nos. 1171 and 1554; from the latter of these the illustration on p. 74 has been copied.

The earliest example of the "anciente" shield of Newcastle upon Tyne, dating about the last quarter of the fourteenth century, is that in painted glass in the north window of the chancel of St. John's church in that city, from which the accompanying drawing is taken. The silver castles are there shown upon a field of a deep rich red colour of striated texture.

There are only nine pedigrees recorded in the three manuscripts comparing with forty-six taken in Yorkshire and fifty-six in Durham at the same visitation. This suggests that the visit north of the Tyne may have been a hurried one of a more or less informal nature, and that the heralds did not get further into Northumberland than Newcastle upon Tyne; possibly the usual summonses were not sent out. The disturbed state of the northern marches may also have prevented the work of the heralds being properly done: the gentlemen of Northumberland were occupied with the realities of border warfare and probably had not much

¹ A copy of these appears in Harleian MS. 1554.

leisure for the mere pageantry of arms.² The itinerary of the heralds also shows that a very short time only was spent north of Tyne. The dated grants of arms show that they were in Yorkshire in mid-July (p. 72 below) and in Durham county from the end of July to the middle of September (see Foster's *Durham Visitation Pedigrees*, p. iii); as the grants made in Northumberland are dated in the middle of August (p. 86 below) not much time can have been spent there. It may also be that these manuscripts do not contain all the pedigrees taken; some additional ones (see p. 95 ff. below) are in Harleian MSS. Nos. 1171 and 1554, but as these are "continued and enlarged" by the pedigrees taken in 1615, it is difficult to be sure which are of 1575. Some of them which have not been printed before are contained in part III below. All the Northumberland pedigrees are authentic visitation pedigrees; details are carefully recorded, shields of arms and crests are drawn for each, and for some, arms illustrating alliances and historical extracts are given. The shield and crest of Lawson (p. 87 below) are, apparently an addition to the original manuscript, the crest indeed is dated 1592.

The manuscript from which part IV is copied is also the work of that diligent herald Robert Glover, and was probably written about the last quarter of the sixteenth century; the folios containing the list of shields of arms here published "are paged separately and appear to have originally formed a separate tract."³ The greater part of the shields blazoned in it are copied from a much earlier roll. Dr. Craster, in his notes upon the forty-five shields of men of Northumberland contained in it, showed that they were those of men living in the first half of the fifteenth century, and he referred the original to "the second or third decade" of that century.³ The result of the study of all the shields by the present editor confirms that date, with, however, the qualification that there are also in it many shields of Tudor times contemporary with the probable date of its transcription by Robert Glover. Attention is drawn to these in the notes, but the following may here be named as examples: Oliver St. John (575) died in 1582; the son of Nicholas Baildon (503) was living at the visitation of 1585, and so also was the son of sir John Burton (509); whilst no. 245 gives the arms of

Thornton of East Newton granted in 1563. Some of the quartered shields are also almost certainly of sixteenth century date.

The manuscript also contains, as Dr. Craster points out, many shields of the thirteenth and fourteenth centuries, such as Baliol (72 and 715), William de Forz, earl of Aumale (252), Lacy, earl of Lincoln (85), sir John Boteourt (260), Fulk Fitzwarrin (265), as well as many of those of the knights, companions of Edward III and the Black Prince, who fought at Calais and Crécy and in the later wars of the prince in Spain and Aquitaine: these and the early Knights of the Garter are well represented by sir Reynold Cobham (134), sir Walter Manny (476), sir Thierry Manny (452), sir Bartholomew Burghersh (487), sir Constantine Mortimer (573), sir John Lisle of Rouge-mont (4), and others whom it is not necessary to name here.

The shields are clearly and neatly drawn, and, with few exceptions, have the name of their bearer written above each, often with the addition of their Christian name as well as of their manor or place of residence. These details suggest that the original manuscript was the work of one familiar with the person whose shield he blazoned. The tinctures are indicated by small single letters or abbreviations: *ar* = argent (silver), *b* = blue (azure), *g* = gules (red), *or* = or (gold), *v* = vert (green), *sa* = sable (black), ermine is tricked, black spots on white. The Roman numerals in the margins refer to the folios of the manuscript; the Arabic figures before each name have been added by the present editor to facilitate reference.

The roll is not free from mistakes, and these give the impression that Glover was not familiar with some of the shields he copied; the tinctures also are sometimes wrongly indicated, as though the original had been in colours which had faded and could not be properly determined. The names also are sometimes miscopied as if the original had become partly illegible and the transcriber had guessed at them. A more important defect is the wrong attribution of some of the shields; for example, the arms of Barton of Newton are given for "James Stranguish" (2), the shield of Manstone is attributed to the strange name of "Anary" (6), "Fitz Harry" (16) is correctly given but the name above the same shield later in the roll (711) has apparently proved a difficulty and appears as "ffherr." Nos. 124 and 125 give two different shields to one curiously

called " Bertun Hucod," whilst, more unpardonable, the shield of Chamberlain (443) is given for sir Reynold Cobham, K.G., whose proper shield is correctly blazoned on no. 134. There are other wrong identifications named in the notes which need not here be recapitulated.

The editor has tried to find some method in the arrangement of the shields, but has quite failed to do so; there is no attempt to arrange the shields as an ordinary nor alphabetically, nor in order of precedence or rank. Great historic shields are next to ones of little or no importance—thus the shield of lord Cobham of Sterborough, K.G. (134), is followed by that of the undistinguished family of Trollope of Thornley, co. Durham. Nor are they in any topographical order; they range in pleasant disorder from Land's End to Berwick Bounds, jumping from county to county in a very irresponsible way. The first folio is typical of many others; upon it are the shields of men from five counties, Sussex, Middlesex, Suffolk, Lincolnshire and Yorkshire; the sixteen shields upon it thus range from Beechy Head to Tees. A careful analysis of all the 752 shields shows, however, that there is a large preponderance of arms of the north of England, that is, of those counties north of Trent which form the province of Norroy King of Arms.

The manuscript contains numerous shields for which it is the only authority, and it is also valuable because of the many differenced or quartered shields it gives for different branches of the same family. Of these there may be mentioned here the five differing shields for each of the branches of Neville and Harrington, or the three each for the Redmans and Radcliffes.

The editor regrets that there are many shields, as well as their bearers, which he has failed to identify. This is perhaps not surprising, as, apart from errors of the copyist, to do so would require an intimate knowledge of the pedigrees of families, some of little importance, of almost every county of England.

¹ H XVI, 54/57; FVY 12; CVY II, 472/77 and notes there given. Beamsley is in West Riding, parish of Skipton. Clapham is in the wapentake of Newcross.

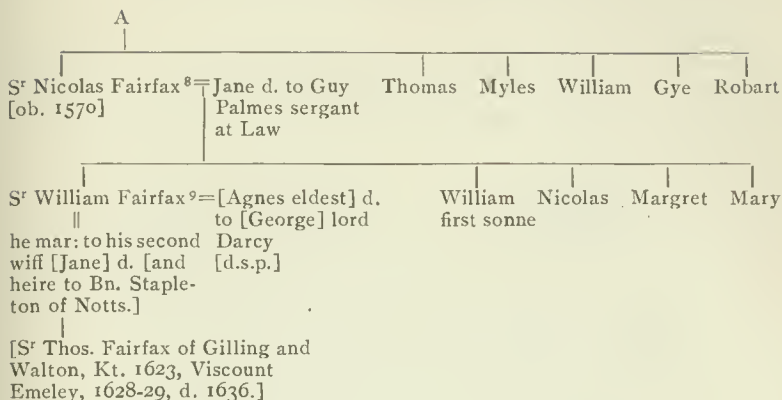

² Granted on 8 February 1499 to William Hares *alias* Smith, co. Leicester, by Carlyle, Norroy. The blazon is *gules on a chevron gold between three bezants three crosses paly fitchy*.

³ The first quarter is apparently Clapham (new) though I am unable to find a grant. The same shield and crest with different colours were granted to John Clapham of London, a younger son of the Beamsley family, by Dethick Garter and Camden Clarenceux, 20 December 1599. (*Vincent's Grants*, Add. MS. B.M. 35, 336.) The second quarter is apparently Clapham (old); it is blazoned for Robert Clapham in Jenyn's roll of Edward III.

OGLE DE BOTHALL IN COMITATU NORTHUMBRIÆ¹

Irenes en grè.

¹The first four generations omitted in MS. Queen's Coll. 126.

1 For full detailed pedigree with notes see HN II, i, pp. 380/87. Also *Ogle and Bothal*, Newcastle, 1902.

The Ogle badge of the rayed rose appears in a window of the north aisle in Bothal church. The motto, "accet gratefully or with thanks," is not elsewhere upon record. The Ogle shield is blazoned *silver a fess between three crescents gules*. It is first blazoned in Willement's roll of Richard II, and is probably derived from the crescent badge of Percy. The crest, here a griffin's head, is given as a grandfather of the first lord Ogle of Bothal, with Haden Bertram, heire of sir Robert Ogle (died 1362), great-grandfather of the first lord Ogle of Bothal, with Haden Bertram, heire of sir Robert Bertram of Bothal, the Ogles quartered the shield of Bertram of Bothal *gold an orle azure* with their own.

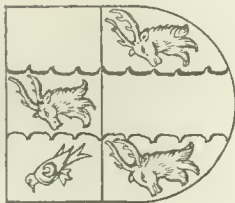

2 Called also Ancrum Moor, fought 1545.

1 Annotated pedigree in HN 11, ii, 230/38; the notes attached thereto fully elucidate this pedigree. See also AA, 2nd ser., III, 189/96.

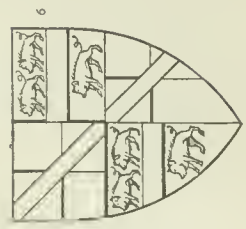

2 Adam of Swinburne, knight, died c. 1326/27; his wife was Idocea Graham. (HN)

3 A generation is omitted here; this John was son of John and grandson of Gerard. (HN)

4 This should be Barnaba; she was the first wife of sir John Stryvelyn. For an account of both see AA, 3rd ser., I, pp. 95/7.

5 Second wife of sir John Stryvelyn. See AA as above, pp. 94/5.

6 The arms blazoned *quarterly silver and gules a bend sable* are derived and differenced, by changing the gold quarter to silver, from the shield of the Fitz Rogers of Warkworth, which in its turn was derived from the quarterly shield of Mandeville, earls of Essex. It is first blazoned in Powell's roll of Edward III. A seal of Gerard Wodderington of 1466 shows the bull's head, neck and mantling powdered with pellets; the blazon is *sable with silver pellets*. (DS 2051; AA, 3rd ser., VI, p. 184.) The quartering on second shield is *gules a fess between three hedgehogs silver* for Claxton. The banner is the cross of St. George, the fly party silver and gules, upon it a two-headed wyvern silver winged gold, the crest as before and the motto *joy . SANS . FIN*.

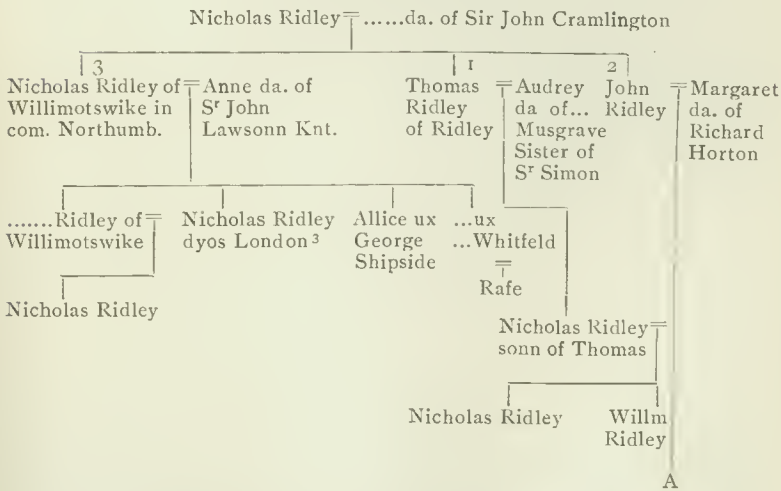

III.—NORTHUMBERLAND PEDIGREES taken A.D. 1575, from Harleian MS. no. 1554; which are not in Queen's College MSS. and not printed by Forster in his *Visitations of Northumberland*.*

[RIDLEY OF WILLIMOTESWICK]¹

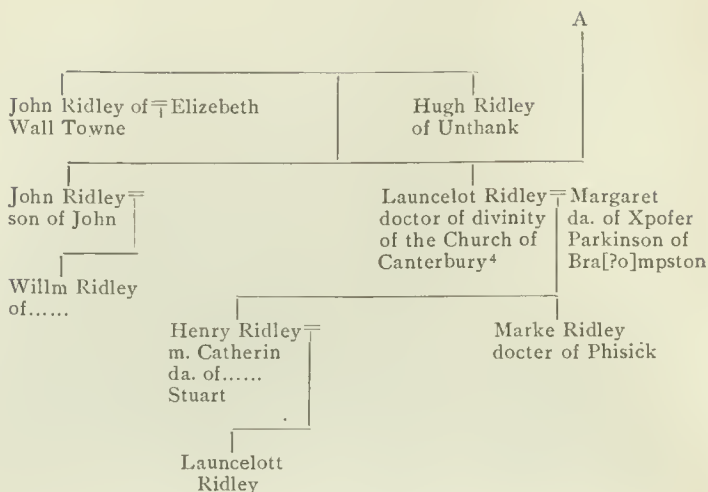

The proper Armes of the Ridles of Willimons Wight in Com. Northumbland is a Red Bull in a feld Argent passing through the reads as descending from the Ridleys of Ridley Hall in com. Cester.

And that they give now 3 Goshawks Argent in a feld geules betweene a Chevron Argent, came by one Wale whose daughter and heire they married with condition that they should so beare their Armes by whome they had the Wale towne and Tecket besyd the greyhound Argent, in the Crest cam by mariage with the daughter and heire of Horton, by whome came Willimons Wight and the Hall in it, now called Ridleys Hall and Corsele, ther cam also unto them the Mannor of Aden by mariag, but with whom it is not yet knowne.²

* Printed, by permission of council, from a manuscript copy in the library of the Society of Antiquaries of Newcastle upon Tyne.

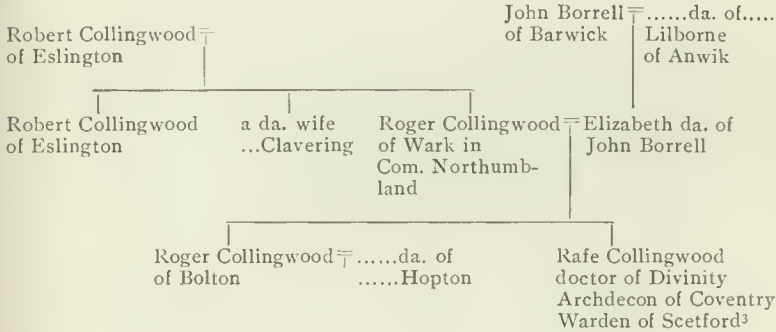

¹ For fuller details of this pedigree see HN II, iii, 339 and notes on following pages there.

² There is no evidence for either of these shields earlier than this visitation. The story here given is apocryphal as no family of Wale or Horton existed in Northumberland in the fourteenth or fifteenth centuries. A seal of Nicholas Ridley of A.D. 1346 shows a stringed bugle-horn and is not armorial.

[COLLINGWOOD OF ESLINGTON]¹

¹ For 1666 Visitation pedigrees see FYN 32-34.

² This, the earliest record of the Collingwood shields, differs from that given in both the visitations of 1615 and 1666. The former gives *silver a chevron sable between three stags' heads rased sable* quartering Buckton, Bowes, Dalden, Conyers and Cosyns, and also a Collingwood shield *silver a chevron azure between three stags' heads rased sable each holding a leaf vert in its mouth*. For shield given in 1666 see Forster as above.

³ S.T.P., Archdeacon of Coventry 1505, dean of Lichfield 1512, died 1521. (Fast. Eccle. Angl. I, s.v.)

¹ This adds information to the pedigree in SS 122, p. 67.

² See quartered and impaled shield SS 122, p. 66. This shield is given in Glover's Ord. for Baxter of Yorkshire.

³ A sir John Routh (de Ruda) was made K.B. in 1306 (SK I, 117), but the arms of the Yorkshire family of the name were *silver a chevron sable between three lions' heads raised gules.* (FVY 404.)

⁴ This shield is given for sir Armand de Ruda in Glover's Ord.

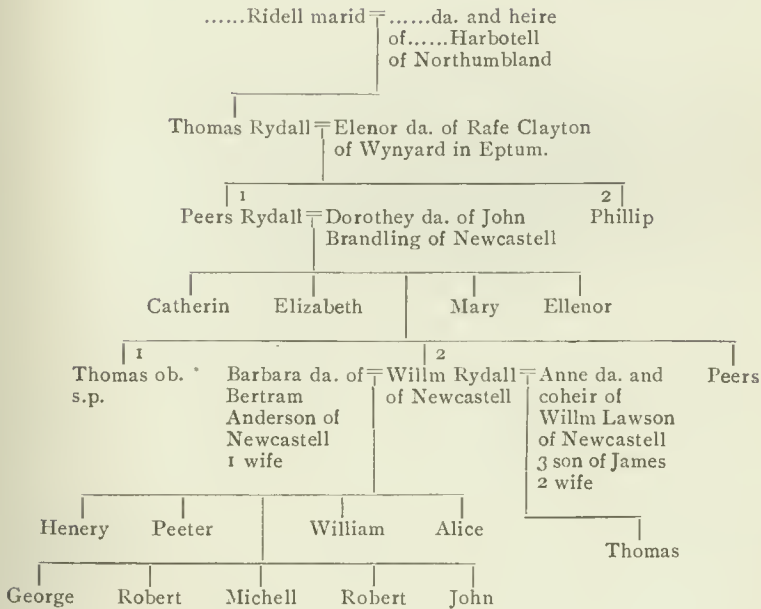

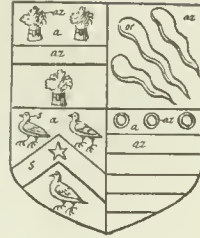

⁵ A John Cutte was knighted 18 February 1503/4. (SK II, 34.)

1. JOHN DE BOUN : gold a plain cross azure.

Fo. 41

S. and h. of sir Humphrey Bohun of Midhirst, Sussex; d. before 26 April 1494; married Anne, dau. of sir Piers Arderne of Latton, Essex. (CP II, 201.) Shield first blazoned in Powell.

2. JAMES STRANGUISH : silver on a fess between six fleurs-de-lis sable, two fleurs-de-lis silver.

The arms of Strangways were *sable two lions passant paly silver and gules*. This is the shield of Barton of Newton on Derwent, Yorkshire. (Pap. 819.) The pedigree of Strangways of Ormesby gives the Christian name of James to eight successive generations. (FVY 202/04.) For Barton see *ibid.*, 133.

3. PECKHAM : azure a cross gold the ends terminating in leopards' faces.

Recorded in Burke. The editor cannot trace the particular family who bore it.

4. SR. DE LYLE: silver a fess between two chevrons sable.

Gold a fess between two chevrons sable was the shield of lord Lisle of Rougemont, a founder of the Garter (KG, plate 35); also blazoned for him in St. George roll. The shield here blazoned, with a different coloured field, is presumably for a younger branch.

5. WILLM̄. INGLEBY: sable a star silver.

So blazoned for John Ingleby in Jen. The arms are those of the family of Ripley, Yorkshire. Pedigree FVY 282/3.

6. ANARAY: sable a bend counter-embattled silver.

The name would seem to be a mis-reading by the copyist; the editor can find no family of the name. The arms as here are blazoned in Glover Ord. for the family of Manston. Manstone is near Leeds. An effigy with these arms is in Leeds parish church. (*Yorks. Effigies* by W. P'Anson, p. 70, fig. 75; also FVY 467.)

7. SALCLYFF: gules a lion rampant silver, over all two bars sable.

So blazoned for a Yorkshire family of the name in Pap., p. 76, without a reference.

8. PANELL of Rason: silver a bend sable.
